

#### Compact

The small footprint of the new CL-E300 makes it a perfect printer for tight spaces but still allows labels up to 4.5 inches wide to be printed on a 5 inch media roll.

#### Connected

With an on-board Ethernet LAN interface as standard together with USB and Serial interfaces, the CL-E300 is perfect for all applications.

#### Complete

The CL-E300 has 203 and 300 dpi versions, as well as cutter options, allowing you to use it in every direct thermal application from low to mid volume printing.

## CL-E300

### Label, Desktop

#### Applications

- Courier
- Logistic / Transport
- Pharmacy
- Retail

The CL-E300 is simple to use and intuitive, ensuring users waste no time when changing labels or adjusting settings.

TOMORROW'S PRINTING TODAY

Featuring on-board LAN, USB and Serial interfaces or with optional Bluetooth, WiFi or LAN with XML support

## Specifications

| Model                       | CL-E300                                                                                                                                   |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| Printing Technology         | Direct Thermal                                                                                                                            |
| Resolution                  | 203 dpi                                                                                                                                   |
| Print Speed (maximum)       | 8 inches per second (200 mm/s)                                                                                                            |
| Print Width (maximum)       | 4 inches (104 mm)                                                                                                                         |
| Media Width (min to max)    | 1 - 4.6 inches (25.4 - 118 mm)                                                                                                            |
| Roll Size (max), Core Size  | Inside diameter 5 inches (125 mm) Core size 1 inch (25mm)                                                                                 |
| Media Sensor                | Fully adjustable gap and reflective black mark                                                                                            |
| Main Interface              | Triple interface USB 2.0, RS-232 and 10/100 Ethernet                                                                                      |
